

iRoom's iDock Touchcode

The world's safest iPad™ in-wall mount.

- » Opening mechanism via 4-digit programmable code
- » Motorized docking and release
- » Back-up administration codes
- » Closing mechanism via proximity touch button
- » Continuous power supply when docked
- » Docking status notification
- » Available in piano black and opal white
- » Available for 110/230V, 12V and PoE
- » Custom colors and multiple codes set-up available
- » Exchangeable guide rails for upgrades to new iPad™ models

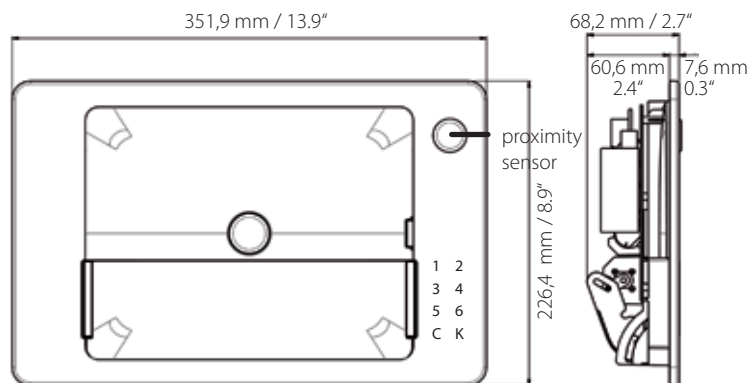

iRoom's iDock Touchcode is the perfect solution whenever your iPad™ needs to be securely stored. For digital signage use in public areas like showrooms or shops, as control panel for boardrooms or as the intelligent concierge in hotels, the possible applications are endless. Thanks to the integrated keypad, the iPad™ can be locked in the docking station and can only be released by entering a 4-digit number code. The LED lit keypad is activated by a proximity sensor and will turn off after entering the security code. Your iPad™ is continuously charged while in the docking station. With iRoom's iDock Touchcode your iPad™ is always safely stored and fully charged.
