

SAG0235

Compression Driver w/ Transformer
(35W | Each)

MSRP:
\$30.05

INTRODUCTION

Our Saga Compression Drivers are designed to work with our 16" and 20" Saga speaker horns. We offer two different drivers and two different sized horns. Between the four, they fit interchangeably with one another. This offers a wide variety of modifications, making your installation a true custom installation.

You don't always want the max amount of power in your horn speaker. If you're installing a speaker system in a relatively small area, you don't want to deafen your listeners. The 35W driver is a great alternative to the more powerful SAG0236 60W Driver, which could be too much power for a smaller area. Combine with the Saga 20" Speaker Horn to allow for a wider range of sound.
