

# SAG4501U

**Non-Impedance  
Matching Volume  
Control 60W**

**MSRP:**

**\$65.99**

## Bring The Concert Home!

This multi room audio piece is eye pleasing, easy to use, and best of all...it's the only Volume Control you'll need to stock. Its quality, power, and sleek look are guaranteed to surpass your expectations. High-quality non-inductive resistors are used to taper the power without affecting frequency response. This is unlike transformer-based volume controls which typically roll-off both ends of the audible frequency spectrum and result in a loss of bass and "air" which effectively changes the timbre of the music. Knowing that you're running into a variety of scenarios out in the field, we have included three of the most common colors of plates, knobs, and straps. So no matter what color plates you find in your customer's home, you'll be dressed for the occasion. With 60 watts per channel, this high quality volume control has an impeccable frequency response and with its competitive price, it's sure to be your go to volume control.

## Features

- » Power handling: 60 watts per channel maximum
- » Input-Output specifications; up to 14AWG wire (compression quick connects)
- » Mounting configuration: Standard single-gang electrical box
- » Includes Matching knob, Decora-style insert, Cover plate and screws
- » Dimensions: 4in H x 1-1/2in W x 2-1/4in D (depth in wall: 2-1/8in)
- » Note: This volume control does NOT offer impedance protection
