

SAG0231

10" Outdoor Speaker Horn w/ Transformer
(70V | Each)

INTRODUCTION

If you need to set up a speaker system outdoors and you need it loud, look no further. Our Saga speaker horns allow for maximum coverage with crystal-clear sound. The quality of Saga is impeccable and the value is unmatched.

Our SAG0231 is a medium sized horn in the Saga series. Even with its moderate size, the SAG0231 will give you a wide range of sound with its 30W of power. The range of this horn will allow you to space your speakers farther apart. By using less speakers and less wire, you will save time and money. With our smaller speaker horns, we wanted to make it simple for you. We attached the compression driver to the cone which takes out the guess work and makes your order quick and simple.
