

SAG0240

Stainless Steel Volume Control
Wall Plate (10W 25/70.7V)

INTRODUCTION

Whether for standard PA, paging, or background music applications, no commercial sound installation is complete without a means to control the volume. The Stainless Steel Volume Control Wall Plate is just the finishing touch you need. The marked dial of the SAG0240 gives you all the control to crank up or tone down the sound as needed. This premium-quality volume control combines dependable performance with low insertion loss, and excellent frequency response.

Stainless steel is the ideal alternative to wood or plastic wall plates. It's tough enough to endure hard blows or knocks, and it resists corrosion and rust. Not to mention its hygiene-friendliness.
