

SAG5300HE

6-Zone Dual Source Stereo Speaker Selector

Bring The Concert Home!

This Dual Source Speaker Selector from our Saga Home Edition™ series is a highly efficient impedance-matching selector designed for use with 4-, 6-, or 8-ohm speaker systems. It's equipped with a low-frequency protection circuit to reduce subsonic signals, which allows high power operation without amplifier shutdown. Autoformers are very efficient because of the small loss incurred as a result of heat dissipation. This makes it safe for you to incorporate up to 2 speakers in all six zones. In addition, the "make before break" design protects your amplifier(s) from damage caused by potential dead-short circuits. Premium construction provides excellent reliability, precise switching and noise-free volume control.

Features

- » Sources to 6-pairs of speakers with push-type switch
- » Power handling RMS: 180 watts RMS per channel
- » Power handling Continuous: 360 watts per channel
- » May be used with 4-ohm, 6-ohm or 8-ohm speaker systems
- » 13.9in L x 2.5in H x 6.0in W
- » Product Weight: 8.82lbs
