24 lbs

MAST NOT INCLUDED
(Choose mast to fit application)

Description

Use this Non-Penetrating Roof Mount Base to safely and securely install dish antennas on flat roofs where drilling holes isn't an option. The heavy-duty steel base is adjustable from 35.5" x 35.5" to 36" x 36" square for a wide-set, sturdy base – the perfect size for the concrete blocks needed for ballast (not included). Once placed and weighed down, simply add a mast (sold separately), and attach your antenna/dish of choice. See our selection of compatible masts: SKY32817A, SKY32817B, SKY32817C, and SKY32817D.
